Health and Safety Standards
Policy on Required Face Coverings

Missouri University of Science and Technology is committed to providing a safe and healthy campus community for students, faculty, staff, and visitors. University of Missouri Collected Rules and Regulations Section 280.010 regarding student health services and University of Missouri HR-700 regarding policies for employees are enacted in response to health and safety.

In response to the COVID-19 public health emergency, Missouri S&T’s Student Health Services, Environmental Health and Safety, and University administration, in accordance with federal and state safety requirements and national and local public health guidance, enacts the following policy to protect the current and future health, safety, and welfare of the S&T community. This policy is intended to minimize the impact of COVID-19 on the campus community and may be altered as needed, based on the severity of COVID-19 and current medical and public health guidance, best practices and evolving science.

Definitions:
Face covering: - A cloth or plastic shield that is worn to cover the mouth and nose to reduce the risk of spreading infectious disease. Cloth face coverings are designed to fit snugly on the face. Plastic shield face coverings are designed to fit closely directly in front of the face but not on the face. The purpose of a face covering is to protect public health.

Face masks: A disposable, one time use mask, commonly referred to as a “surgical mask”. Face masks serve two purposes: 1) A non-medical face mask meets the purpose of a facial covering and therefore may be worn as such. 2) A medical face mask is available in several levels of protection and is designed to protect health care workers from fluid exposure.

Personal protective equipment (PPE): - Equipment that is worn to minimize exposure to hazards that cause serious workplace injuries and illnesses. Respirators are PPE and should not be worn as a face covering. N95 and KN95 masks are considered respirators and ‘fit testing’ is required for proper usage.

Policy:
Effective Aug. 2, 2021, all Missouri S&T students, staff, faculty, vendors, suppliers, and visitors will adhere to the following health and safety practices to reduce the spread of infectious disease.

- Face coverings are required for all, regardless of vaccination status, in:
  - Classrooms, lab environments and meeting spaces of university-owned or university-operated buildings when six feet of social distancing is not possible; and
  - During activities when six feet of consistent physical distancing cannot be maintained.
- Face coverings are required for unvaccinated individuals in common indoor areas.
- In classrooms, faculty will wear a face covering or face shield that facilitates enhanced communication to students.
Face coverings alone are not a substitute for compliance with physical distancing and robust personal hygiene. Members of the campus community should practice robust personal hygiene including frequent hand washing, avoiding touching the face, covering coughs and sneezes, and sanitation of shared surfaces like conference room tables and lab surfaces.

While on campus, everyone is expected to carry a face covering at all times, in the event they encounter an unforeseen situation where a face covering is required.

**Exceptions:**
Face covering exceptions include individual private workspaces when alone or when six feet of physical distancing is maintained, and in residence hall private rooms, suites, and apartments when alone or with a roommate(s).

Individuals are not required to wear a face covering when eating in a seated dining area when at least six feet of physical distancing can be maintained. Face coverings are not required when walking alone in an uncrowded outdoor location where six feet of social distancing can be consistently maintained.

In circumstances in which an extenuating medical or health-related risk exists related to use of face coverings, the student, employee (staff or faculty), or visitor may request an accommodation through the appropriate department outlined below. Students and employees will be required to provide supporting documentation as part of the accommodation process.

**STUDENTS**
Students with questions regarding academic or co-curricular accommodations may contact Testing and Student Disability Services at 573-341-6655 or dss@mst.edu.

**EMPLOYEES**
Employees, including staff, faculty, and student employees who have questions regarding exceptions or employment accommodations may
- Complete the online form; or
- Contact the ADA Compliance Office at 573-341-7734, equity@mst.edu.

Any exceptions to this policy will be made in coordination with the campus Health Officer and Environmental Health & Safety. Coordination will also include Human Resource Services as appropriate.

**Policy Execution/Enforcement:**
Concerns involving students or student organization compliance may be reported to the Office of the Vice Chancellor of Student Affairs for review and education in accordance with the University of Missouri Collected Rules and Regulations Section 200.020 Rules of Procedures in Student or Student Organization Conduct Matters.

Concerns involving employee compliance may be reported to the appropriate authority, supervisor or administrator, or to Human Resource Services in accordance with the University of Missouri Collected Rules and Regulations Chapter 330 – Employee Conduct.
EFFECTIVE DATE: July 29, 2021

RESPONSIBILITY: All Admitted or Enrolled Missouri S&T Students, Staff, Faculty and Visitors to the Campus.

BASIS: Chancellor, upon the recommendation of current, best practice medical guidance from the Chief Medical Officer, public health guidance, federal and state workplace safety requirements, and in alignment with the University of Missouri Collected Rules and Regulations Chapters 200, 280, 330, and HR-700.

Mo. Dehghani, Ph.D.
Chancellor
